Intro

You might wonder why there was a need for another token on the market and you are probably right, there is no need as there are a lot of them and by using smart contracts, anyone can launch a token in minutes, of course, with some basic knowledge.

The NVM token was created as part of a bundle of projects that will be launched soon and it is going to be used as an in-house reward token for different actions that will be made in those apps.

Benefits

Some of the benefits that this token will add to the “industry”:

- **A unique way to add rewards and quickly convert to cash.** Think for example of a social network system like Facebook and where you get rewarded to post content, comment on other people photos, vote on polls and so on.
- **Best customer service.** We aim to have the best customer service, which is essential when working with money. We aim for 24/7 support, but we admit that in the beginning until everything is being setup, there will be some delays.
- **Built on Fantom network.** There is no need for another wallet to host this token separately, the token can be easily added to your Metamask account. In Asset Management, just add the NVM contract address in the import tokens section and add it to your home screen.

NVM Token

Feature Rollout

- Token creation
- Presentation platform at nvm.xyz
- Add token to multiple markets
- Create first DAPP project that uses the token
- and more...

Device Coverage

NVM Token DAPPs will be provided on cross-platform devices, such as:

- Web based
- Android native client
- iOS native client
- Mobile HTML5 client
- PC (Windows) native client
- REST API

Multilingual Support

We will support English and Romanian on all of our user interfaces as the initial release. More languages will be added over time.

NVM Token (NVM)

We have issued our own token, called the NVM token. A strict limit of 8,000,000,000 coins is created, never to be increased. NVM will run natively on the Fantom blockchain.

Allocation

%	Amount (NVM)	Participant
12.5%	1,000,000,000	Locked Exchange dAPP
12.5%	1,000,000,000	Future exchange platforms
1%	80,000,000	Funding team
61.5%	4,920,000,000	Minted during a 5-year period
12.5%	1,000,000,000	BURNED

NVM Value & The Burn

You can use NVM tokens to pay for any fees or features on our future platforms, including but not limited to:

- Purchasing various features on the platforms
- Purchasing coins through our own DAPPs platforms
- Exchange coins fees through our own DAPPs platforms
- Any other fee

The Burn

By looking at the Allocation table in the previous page, one can see exactly how the coins are divided for use. There are 1 billion NVM tokens burned at this moment that cannot be recovered in the future.

Team

Cristian Badea – CEO [Linkedin Profile](#)

I have a lot of experience in customer support and as a programmer. This is considered to be my heart and soul project. At the beginning, this will be run entirely by myself, with more people to be hired as time passes.

I am living in Romania, a beautiful country near the Black Sea. I am fully bilingual in English and Romanian.

Risks

There are many risks involved in running your own token. We understand this and have the skills, experience, and leadership to overcome them.

Competition

We know that this will be an ultra-competitive area. There are probably hundreds of tokens spread around each major blockchain like Ethereum, Bitcoin, Binance, EOS and more.

Competition will be fierce, but in this age, one needs to overcome them in order to succeed as a concept / startup of any company.

The main question would be: Giving the team, the experience, the concept, the resources and products that are released or going to be released, do you believe that we will stand a better chance than the rest of the pack? Then give us a chance, we promise that we will not disappoint you.

Final thoughts

Bear in mind that this whitepaper is at version 0.1. This will be regularly updated and notifications will be added on the main presentation website at www.nvm.xyz

For any questions / concerns, feel free to contact us at hi@nvm.xyz
